Questions

What counts as a page?

Any distinct URL with its own layout and content, such as Home, About, Services, Contact, or a service detail page. Blog posts in Growth and above are not counted as pages.

I need more pages than my package includes. What happens?

Add them at the per-page rate, or step up to the next tier if you need several. We will recommend the cheaper option when we scope your project.

What is the difference between a static and a dynamic website?

A static site is built once and served as fast, pre-rendered pages. Changes go through us or your Care plan. A dynamic site adds an admin panel so your team can edit content, manage listings, and view leads without touching code.

Do you use WordPress or templates?

No. Every site is custom-built with Next.js and deployed on modern edge hosting. That is why they load in under two seconds and score well on Core Web Vitals.

How it works

- All prices are "starting from". A fixed quote is confirmed after a short scoping call.
- Payment terms: 50% advance to begin, 50% on launch. Custom software follows milestone-based billing.
- Domain registration is billed with a small management fee. Paid hosting and third-party services (if any) are billed at cost. Setup and deployment are included.
- Content (text, images, logo) is provided by the client unless copywriting or brand kit add-ons are selected.
- Timelines start once content and the advance are received. Revision rounds beyond the package are billed hourly.
- Lifetime support means we will always answer your questions and fix defects in what we built, at no charge. Hosting, updates, and content changes are separate: free for the change window in your package, then covered by a Care plan or billed hourly.
- Source code is handed over on final payment. You own your website.
- INR prices exclude GST where applicable. USD prices are for international clients.

Recent work

Vyanacare: multi-center physiotherapy website launched in 20 days, plus a custom clinic management platform. KioSnap: multi-vendor marketplace and vendor storefronts. MiningNow: real-time data platform serving 25,000+ monthly users. Case studies at qubexiq.com/work.
